

Tower Location: Unknown. The location of their Tower is a well-kept secret.

Summary: Feared self proclaimed enforcers of ancient laws and contract assassins.

Notes: The Shadowsfall claim to be the ancient law-keepers of Orin Rakatha and are often found carrying out these duties. They also act as 'honourable' assassins for hire, though they follow strict terms usually involving a death rather than oblivion. Their true motivations are not understood and their codes of behaviour are strange. Most Towers have a relationship with the Shadowsfall based on caution with a hint of fear.

When working on a contract this is shown by the wearing of symbols on their faces. Shadowsfall individuals can be extremely dangerous, more so than any other Tower, especially if you have status.

Colours: Grey and burgundy with a shield motif.

Activity Level: active all over the plane but in very limited numbers.
